

Klippon® Protect – Window sets

Customise your enclosures even better

Perfect status view of your electrical solution

Optimally adapted and functional enclosures make an important contribution to increasing the safety, performance, and cost-effectiveness of many industrial applications.

Viewing windows in the enclosure covers make it easier to visually inspect active components and detect operating statuses without having to open the enclosure. In addition to our standard FPC and MPC plastic enclosure series with transparent lids, viewing windows can now also be integrated into Klippon® Protect metal enclosures. This way we offer one more option for modification in order to meet your requirements even more precisely.

Description	Dimensions in mm	UL 94	Material
WINDOW SET 120X160	120 x 160 x 4	V-0	Polycarbonate (PC)
WINDOW SET 140x240	140 x 240 x 4	V-0	Polycarbonate (PC)
WINDOW SET 190x330	190 x 330 x 4	V-0	Polycarbonate (PC)
Note	Products are only available in combination with enclosures (via the Weidmüller Configurator or Engineer-to-Order process).		

Your special advantages:

- Fast status check of applications in harsh conditions possible
- Individually positionable viewing windows
- Any desired window size available on request
- Three standard window sizes available directly in the Weidmüller Configurator (WMC) for a millimetre-precise positioning
- Fulfilment of all common industrial requirements for empty enclosures
