Plan more flexibly, achieve goals faster
“Configure to Order” for assembled terminal strips and enclosures
Let’s connect.
Focus on your core business
“Configure to Order” enables short-term delivery of assembled products

Orders on demand, tight deadlines and last-minute design changes are the results of an increasing demand for individuality and shorter decision-making periods. To ensure timely and error-free delivery in the face of this complexity, you need to be able to rely on a partner that can keep pace with your short timeframes and that can offer small batches economically.

Greater flexibility in your project business combined with reliable planning

With our Klippon® Service “Configure to Order” including „Fast Delivery Service“, we offer you the advantages of quotations within minutes, flexible made-to-order production and binding delivery times for individual assemblies. The key to this performance is our Weidmüller Configurator (WMC), in which you autonomously plan, document, enquire about and order your project – 7 days a week, around the clock. Depending on the choice of service level, we assemble your components selection based on your WMC file within a promised time and then send it out to you directly.

Benefit from full data consistency and process digitalisation with your enquiries and orders, giving you a decisive efficiency advantage for your planning. In order to enable you to process smaller projects and individual requests economically as well, you can place orders for quantities of one.
Your added value in 3 phases: plan, install, operate
This is how „Configure to Order“ supports you in your daily processes

Offer in minutes
Article numbers for articles that can be ordered directly are already included in the offer – e.g. for your parts lists and documentation. No more long waiting times and clarification times.

Streamlining of your warehousing
You receive a ready-assembled and tested product – with a minimum order quantity of 1. You no longer need to store individual components.

Data consistency from the outset
Interfaces to the Weidmüller Configurator (WMC) shorten the planning time and minimise the risk of errors. You plan in your usual ECAD system and the WMC supports you with the component selection.

Focus on your core competence
The assembled products are delivered ready to install. This saves time and costs that you can invest in your added value.

Reliable procurement time
Depending on the selected service level, your order is ready to send in 4 to 9 days – even in the case of future maintenance and repairs on your plant.

Installation efficiency gains
The output of 3D visualisations enables more precise streamlining and facilitates the configuration. At the same time, data is available for industrial automation.
Define your own delivery time thanks to “Configure to Order”
We give you the choice of 3 service levels

4 Day Fast Delivery Service
Highest delivery performance, selected product range
The ideal solution for very demanding delivery schedules

- The best solution for the necessary technical functions and fast availability of either terminal strips, empty or assembled enclosures
- Ready for dispatch from Germany in 4 days

9 Day Delivery Service
Broad range, dependable availability
Diverse options, also for short implementation phases

- Broad and market orientated product range in dependable availability of either terminal strips, empty or assembled enclosures
- Ready for dispatch from Germany in 9 days

Direct Offer Service
Individual configuration, direct offer
Unlimited selection for longer-term planning horizons

- Individual configuration of either terminal strips, empty or assembled enclosures
- Delivery time on request
Direct Offer Service

- Individual configuration, direct offer
- Unlimited selection for longer-term planning horizons
- Individual configuration of either terminal strips, empty or assembled enclosures
- Delivery time on request

**Added value**

- Offer provided in minutes
- Available 24/7, including order numbers for direct ordering
- Assembly in quantities of 1
- Ready-to-install assembly that meets your individual specifications
- Reliable delivery
- Depending on service level ready for dispatch in 4 or 9 days from Germany
Fast tracking planning processes effectively
Weidmüller Configurator (WMC) simplifies configuration and requesting

The choice is yours

The WMC supports you step-by-step as you select and configure your assembled terminal strips and now an extensive range of enclosures, including accessories. You decide whether you want to carry out the complete configuration in WMC or whether you want to import data sets from your ECAD system and, after making final adjustments in the WMC, simply transfer them back again. Whichever way you decide to go, you will benefit from centralised documentation that is always up to date, you will avoid transmission errors and you will no longer have to share your sensitive data with a third party. Using STEP, the universal 3D CAD exchange format, you can now also export your WMC solution directly into your MCAD system, ensuring complete data consistency in all your systems.

1. Project planning in your usual ECAD system with interface to the WMC.

2. Selection of the optimal components based on the required service level. Simple selection of the enclosure and relevant accessories.

3. Review of the selected combination by the integrated verify assistant – to ensure maximum product safety.

4. Direct request from the Weidmüller Configurator with automatic offer created within just a few minutes.
3 good reasons to start using the WMC now:

1. Secure and intuitive
Always current product data, the integrated plausibility check and the seamless documentation ensure that you can rely 100% on your configurations. The clear 3D realtime visualisation makes configuration significantly easier.

2. Convenient
Integrated interfaces facilitate the easy import and export of product data between the WMC and all commonly-used engineering tools, such as E³ or EPLAN electric P8.

3. Futureproof
The high quality product data and the standard export functions are preparing the way for the increasing automation in panel building.

Test it now! Download the Weidmüller Configurator and enjoy the benefits of „Configure to Order”
