

## Reliable switching of industrial loads and safe separation and multiplication of signals

With our high-performance relay modules and solid-state relays

### Universal range

#### Relay modules

For switching and amplifying digital signals in automation technology and for galvanic isolation.

#### TERMSERIES

The all-rounder. Modular relay modules from 6 mm width with extensive accessories, large selection of variants and unlimited cross-connection possibilities.

#### RIDERSERIES

High-quality universal relays with many sophisticated details and international approvals in different designs for industrial applications.

#### D-SERIES

The industrial relay modules with innovative features, an extensive range of variants and a wide assortment of designs for a variety of applications.

#### Solid-state relays

For wear-free switching and amplification of digital signals in automation engineering.

### Application range

#### Timing functions

Timing relays are used in automation technology to compensate for errors due to short cycle times.

#### Special loads

Relays to switch and monitor special loads, such as inductors and high inrush currents, safely and reliably.

#### Sensor isolation

Space-saving and fast switching coupling elements to decouple sensors from the field.

#### High switching frequencies

Specially designed solid-state relays for reliable and fast decoupling of signals up to 550 kHz.

#### Signal adaption

Adaptation of signals and their transmission from other systems to the control cabinet level.

#### Functional safety

Power-solid-state contactor up to 75 A and miniature contactors up to 30 A.

#### Power

Specific safety relays required for signals in process safety-related systems.

Relay modules and solid-state relays

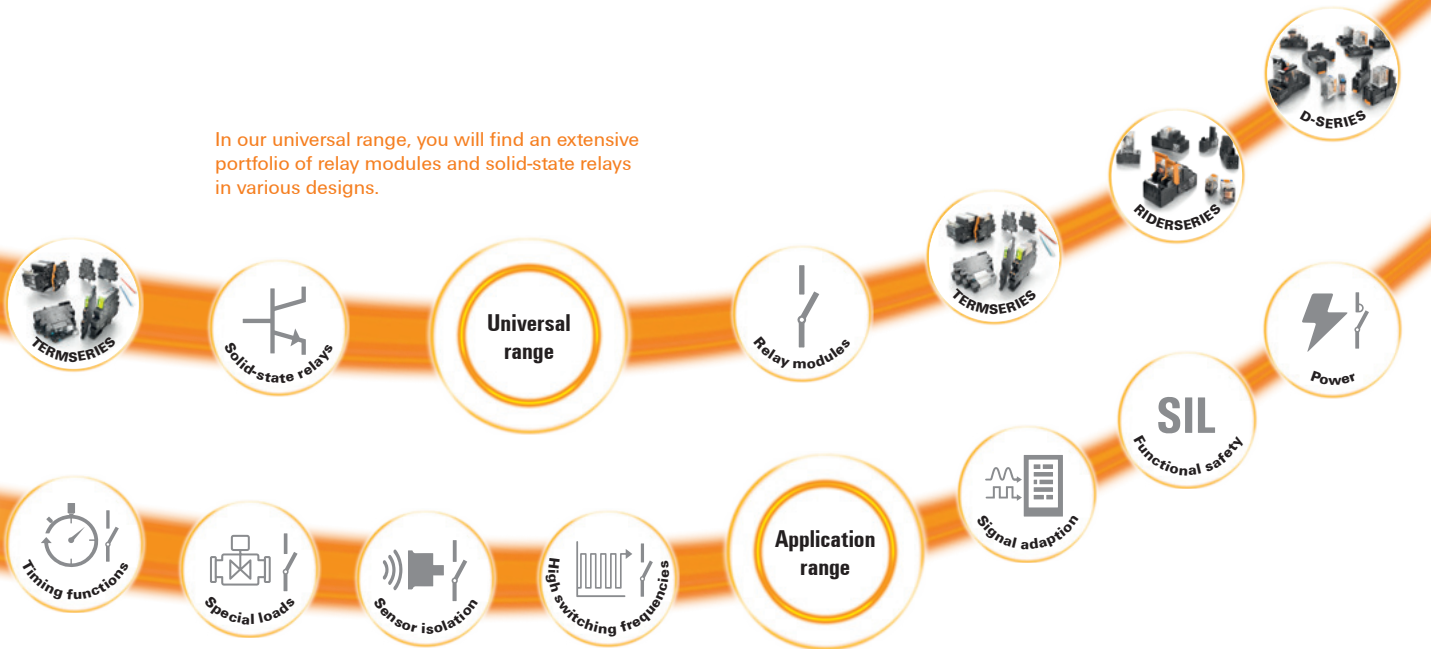

## Solutions for more productivity

### Design processes highly flexible – with Klippon® Relay

For more than 40 years, we have specialised in the optimisation of switch cabinet infrastructures. Our wide range of relay modules, solid-state relays and additional value-added services combine the highest standards with ultimate quality. Less wiring effort, housing optimisation through space saving, optimal marking and cost reductions – our customers' challenges are our motivation.

In our universal range, you will find an extensive portfolio of relay modules and solid-state relays in various designs.

In our application range, you will find a tailor-made portfolio of products to increase your productivity and safety for various fields of application.

Our assortment impresses through reliability, longevity and safety. Supplemented by our digital data support, switching load consulting and online selection guides, we support our customers throughout the entire work process – from the planning phase to installation and operation.

Let's connect.

Weidmüller – Your partner in Industrial Connectivity.

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. We are at home in their industries and markets and know the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs. Together we set standards in Industrial Connectivity

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of making orders. We try our best to quickly correct errors in our printed media. All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. On demand we can also send the general terms of delivery to you.
