

Firmware change-log of new features and bug fixes of the u-remote field bus coupler: 2599670000 UR67-PN-V14-CU-8DIDO-12

Firmware updating Information:

An update of the firmware can be done via the embedded web server. A description of the firmware update can be found in the u-remote web server manual on the Weidmüller website: www.weidmueller.com

<u>Version 01.01.02</u>	<u>Hardware Version 01.xx.xx</u>	<u>Release date: June, 2020</u>
--------------------------------	---	--

Bug Fixes:

- Fixed that line delay measurement could cause problems with devices from other manufacturers
- Fixed that during a short circuit is pending the corresponding diagnosis appears and disappears cyclically when the cycle time is set to a higher value

<u>Version 01.01.00</u>	<u>Hardware Version 01.xx.xx</u>	<u>Release date: July, 2019</u>
--------------------------------	---	--

New feature:

- Support of UR67-PN-V14-POF-16DI-12 and UR67-PN-V14-POF-8DIDO-12

<u>Version 01.00.02</u>	<u>Hardware Version 01.xx.xx</u>	<u>Release date: June, 2019</u>
--------------------------------	---	--

New feature:

- Firmware update now possible while being connected to the fieldbus

Bug Fixes:

- Fixed that in very rare cases data communication packages were lost

<u>Version 01.00.01</u>	<u>Hardware Version 01.xx.xx</u>	<u>Release date: March, 2019</u>
--------------------------------	---	---

Bug Fixes:

- SF-LED only lights when respective parameter is active
- "Channel-Error-LED" only lights when diagnostics are enabled
- "US2-LED" switches off if activated when below 19.2V

<u>Version 01.00.00</u>	<u>Hardware Version 01.xx.xx</u>	<u>Release date: February, 2019</u>
--------------------------------	---	--

Information:

- First released version
