

Hardware Installation Guide

Managed Fast/Gigabit Ethernet Switch

IE-SW-AL08M-6TX-2GT (Part No. 2682290000)

1. Introduction

Ethernet Switches from Weidmüller are designed for industrial applications and fitted with a robust housing. To ensure reliable, error-free operation, and to prevent damage or injury, please read the operating instructions, all safety information provided in this document and any other safety information that were supplied with the product.

2. Safety notice

The device heats up during operation. Allow the unit to cool down or use protection gloves when carrying out any work. The device may only be connected to the supply voltage shown on the product label.

The device must be supplied by a SELV source as defined in the Low Voltage Directive 2014/35/EU and 2014/30/EU. Installation, commissioning and maintenance may only be performed by qualified

electricians

Higher voltage than specified will destroy the device.

Indoor use and pollution degree II, it must be wiped with a dry cloth for clean up

- o Utilisation en intérieur et degré de pollution II, il faut l'essuyer avec un chiffon sec pour nettoyer l'appareil et son étiquette.
- · Do not block air ventilation holes.

Observe the operating instructions.

the device and label

- o Ne bouchez pas les orifices de ventilation.
- If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.
- o Si l'appareil est utilise d'une maniere non specifiee par le fabricant, la protection qu'il apporte peut se voir diminuee.
- Shall be mounted in the Industrial Control Panel and ambient temperature is not exceed 75 degrees C.
- o Doit être monté dans le panneau de commande industriel et la température ambiante ne doit pas dépasser 75 degrés C.

Intended use: The device is intended for the realization of communication networks within an industrial environment, it is intended to be used in a restricted access location. The device may only be used within the scope of the specified technical data. The device is intended to be mounted to a well-grounded mounting surface, such as a metal panel. Any other use may result in unintentional malfunction and damage. Observing documentation is part of the

Environmental conditions: This equipment is intended to be used in a restricted access location. When planning the installation site make sure that the ambient temperature during operation will not exceed the temperature given in the technical data. Also make sure that the air flow will not be compromised by other devices. Ensure that the mounted and wired device is not exposed to any mechanical stress.

FCC compliance: This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

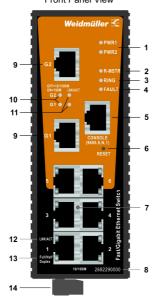

3. Package Checklist

Your Ethernet Switch is shipped with the following items:

- Ethernet Switch
- Hardware Installation Guide (printed)
- 7-Pin Terminal connector
- Serial console cable
- Protective caps for RJ45 ports

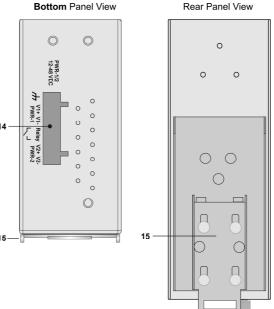

4. Panel Layouts

IE-SW-AL08M-6TX-2GT

- 1. Power Input LEDs (PWR1 / PWR2)
- Ring Master Status LED
- Ring Status LED
- Fault LED (PWR1/PWR2 fault or port link loss)
- Serial Console Port
- 6. Reset Button
- 10/100BASE-T(X) Ports
- Article Number
- 10/100/1000BASE-T(X) Port
- 10. Port Speed LEDs 10/100/1000BASE-T(X)
- 11. Link/Activity LEDs 10/100/1000BASE-T(X)
- 12. Link/Activity LED 10/100BASE-T(X) port
- 13. Duplex mode LED 10/100BASE-T(X) port (Amber = Full Duplex, OFF=Half Duplex, Blinking = Collisions)
- 14. Terminal block for power input PWR1 / PWR2 and failure relay for power and port link loss (output)
- 15. DIN-Rail kit

Rear Panel View

5. DIN-Rail Mounting

Slide the switch onto a DIN-rail and make sure that the switch's Din-rail clip clicks into the rail firmly.

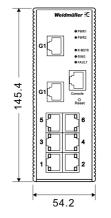

STEP 1: Place the mounting clip from above onto the mounting rail.

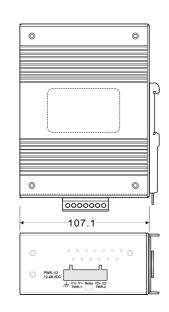

STEP 2: Press the device against the DIN rail until the fastening element engages on the mounting

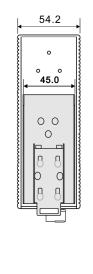

To remove the Ethernet Switch from the DIN-rail pull down the latch with

a screwdriver then move the device away from the DIN rail and lift it up.

6. Mounting Dimensions

(units = mm)

7. Grounding Ethernet Switch

ATTENTION

- Grounding and wire routing help limit the effects of noise due to electromagnetic interference (EMI).

prior to connecting devices.

the ground connection from the ground screw to the grounding surface

- This product is intended to be mounted to a well-grounded mounting surface, such as a metal panel.
- The shielding ground of the RJ45 ports are electrically connected to the ground connection (screw).

8. Wiring Redundant Power Inputs and Fault Alarm Relay

The switch supports redundant power supply inputs and provides a fault alarm relay for detecting the user-configurable failure events

- Interruption of Power 1 or Power 2 and
- · Link Loss of Ethernet Ports.

Refer to illustration below for correct wiring

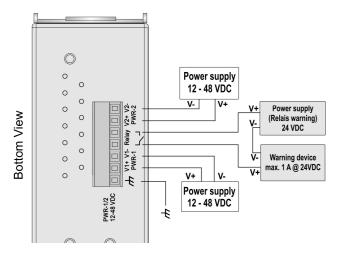

Warning / Avertissement

- Take into consideration the following guidelines before wiring the device.
- o Tenez compte des directrices suivantes avant de câbler l'appareil.
- Terminal block is mating with Plug and suitable for 12-24AWG. Torque value 4.5 lb-in.
- o Le bornier est compatible avec les connecteurs et convient pour 12-24AWG. Valeur de couple 4,5 lb-in.
- The temperature rating of the input connection cable should higher than
- o La température de service nominale du câble d'entrée doit être supérieure à 105 °C.
- Supplied by SELV source evaluated by UL 61010-1 or 61010-2-201 power supply only.
- o Fourni par la source SELV évaluée uniquement par l'alimentation UL 61010-1 or 61010-2-201.

3

Behavior of fault alarm relay (can be triggered by configurable events <u>power failure</u> or <u>port link down</u>):

- Relay contact is closed if the device is powered-off.
- Relay contact is open if the device is powered-on and no alarm conditions exist (neither Power Failure Alarms nor Port Link Loss Alarms are activated (Web menu Warnings → Fault Relay Alarm).
- Relay contact closes if any of an activated alarm condition happens.

9. Communication Connections

Switch IE-SW-AL08M-6TX-2GT is equipped with:

- 6 x 10/100BASE-T(X) Ethernet ports (Auto MDI-X)
- 2 x 10/100/1000BASE-T(X) Ethernet ports (Auto MDI-X)

Please only use cables suitable for the respective type of communication and ensure that signals are protected from possible interference.

9.1 10/100BASE-T(X) and 10/100/1000BASE-T(X) RJ45 Ports

The RJ45 ports located on Ethernet Switch's front panel are used to connect to Ethernet-enabled devices. Below we show pinouts for both MDI (NIC-type) ports and MDI-X (HUB/Switch-type) ports. Auto MDI-X ensures that both wiring-schemes are supported (Automatic crossover function).

10/100BASE-T(X) RJ45 Pinouts

MDI Port Pinouts		MDI-X	Port Pinouts	8-pin RJ45	
Pin	Signal	Pin	Signal		
1	Tx+	1	Rx+		
2	Tx-	2	Rx-	١ الـٰ الـٰ ا	
3	Rx+	3	Tx+		
6	Rx-	6	Tx-	1	

10/100/1000BASE-T(X) RJ45 Pinouts

10/100/1000BAGE 1(A) ROTO I IIIO UIS						
8-Pin RJ45	10/100BASE-T(X) MDI/MDI-X			1000BASE-T MDI/MDI-X		
Port	Pin No.	MDI port	MDI-X port	Pin No.	MDI port	MDI-X port
E L	1	TD+(transmit)	RD+(receive)	1	BI_DA+	BI_DB+
	2	TD-(transmit)	RD-(receive)	2	BI_DA-	BI_DB-
	3	RD+(receive)	TD+(transmit)	3	BI_DB+	BI_DA+
	4	Not used	Not used	4	BI_DC+	BI_DD+
	5	Not used	Not used	5	BI_DC-	BI_DD-
— -	6	RD-(receive)	TD-(transmit)	6	BI_DB-	BI_DA-
	7	Not used	Not used	7	BI_DD+	BI_DC+
	8	Not used	Not used	8	BI_DD-	BI_DC-

9.2 RS232 Console Port

The RS232 Interface with RJ45 connector can be used to access the switch console for configuration.

Pinouts Serial Console Port:

8-Pin RJ45 Port	Pin No.	Pin Assignment	Communication Parameters	
− ∞	2	RxD	Baud Rate: 9600 bps	
│ 	3	TxD	Data Bit: 8	
E_	5	GND	Parity: No Stop Bit: 1	
	1, 4, 6-8	not assigned	Flow Control: No	

10. User Management

10.1 Device Access (Login to Web Interface)

The Web interface of the Switch can be accessed via following factory default settings:

Connect the PC to any Ethernet port of the managed Switch and set the PC's IP address to a free one of range 192.168.1.0 / 255.255.255.0

Start a web browser and enter the IP address of the connected Switch into the browser's address line (http://192.168.1.110). After the appearance of prompt (login) enter the login credentials. After confirmation of your input with "OK" the home page of the switch will be displayed.

Note: For more detailed information about configuration and use of the device features please read the downloadable manual from Weidmüller's website (Product catalogue → Automation & Software → Industrial Ethernet → Advanced Line managed Switches → Select Product → Click and expand section "Downloads" → Download needed software or documentation).

10.2 Reset Button

- Press reset button for 2 to 3 seconds to reboot the switch (Warm Start).
- Press reset button for >= 5 seconds to reset the switch to factory default settings.

11. LED Indicators

The front panel of the Ethernet Switch contains several LED indicators. The function of each LED is described in the table below.

LED	Color	Status	Description	
PWR1	Green	On	Power supplied to power input PWR1.	
PWR2 Green		On	Power supplied to power input PWR2.	
R-MSTR (Ring Master)	Green	On	Is Ring Master of an enabled O-Ring.	
Ding	Green	On	O-Ring redundancy is enabled.	
Ring		Blinking	Ring structure is broken (No redundancy).	
FAULT	Amber	On	Fault Relay indication for Power failure and Port link loss.	
LAUCIAOT	Green	On	Port's link is active.	
LNK/ACT		Off	Port's link is inactive.	
(Ports 1 - 6)		Blinking	Data is transmitted.	
Full / Half	Amber	On	Port is set to Full Duplex Mode.	
Duplex		Off	Port is set to Half Duplex Mode.	
(Ports 1 - 6)		Blinking	Packet collisions detected.	
LNIZZAOT	Green	ON	Port's link is active.	
LNK/ACT Ports G1/G2		OFF	Port's link is inactive.	
FUI IS G I/GZ		Blinking	Data is transmitted.	
Speed	ON) Amber	On	Port speed is 100 Mbps	
Indication (OFF / ON) Ports G1/G2		Off	Port speed is 10 or 1000 Mbps
