8D Problem Solving Process

Get a clear picture of the problem. Does an 8D have to be initiated for the problem?

D1
Deal with the problem in a team. Select a collection of individuals who are responsible for the problem.

D2
Describe the problem. Define the actual (not perceived) issue.

D3
Initiate temporary actions to limit damage. Define immediate actions to ensure customer protection and monitor their effect.

D4
Determine the root cause(s). Identify the real cause of the defect to be capable of deriving effective corrective actions.

D5
Define corrective action(s). Planning permanent corrective action(s) and monitor its/their effectiveness.

D6
Introduce the corrective action(s). Introduce permanent corrective actions and monitor its/their effect.

D7
Determine actions that prevent recurrence of the problem. Avoid defect repetition / Implement preventive actions.

D8
Honour the team's achievement and success. Honouring the team achievement / Expression of thanks.

Weidmüller will offer webinar assistance for 8D methodology
