

Technical change to FieldPower® IP65 power supplies

Dear Madam or Sir,

the products listed below will be changed after a transitional period.

Please pass on this Product Change Notification (PCN) to your employees and, if applicable, to your customers.

1. General overview

Type of change: ☒ **short-term** (executed within the next 6 months)
☐ **normal** (executed after 6 months)

Short-term action due to:

2. General information

The FieldPower® IP65 power supplies listed below receive UL508 approval. This is accompanied by minor technical changes, which however do not cause any change in known functions.

An exception to this is the change described under "3."

3. Change details

In the course of the changes for the new UL approval and the extension of the product range by a 48VDC power supply, the wire bridges between "+1" and "+2" or "-1" and "-2" on the secondary side connector are removed, see pictures. In future, the 24V potential is to be tapped via the connections "+1" and "-1". If required, the wire bridges can be prepared and assembled by the customer.
