

Technical change to IE-SW-ELB-series (Ethernet unmanaged Switches of EcoLine series B)

Dear Madam or Sir,

the products listed below are subject to a product change and will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications mentioned have been made to support our ongoing commitment to continual improvement and ongoing product development.

1. Initial situation

Product revision change due to hardware re-design.

2. Technical changes

1.) Increased MAC-table, packet buffer, QoS queues and operating temperature range.

Article name	Article number	MAC-table size	Packet buffer size	QoS priority queues	Operating temperature range
		HW-Rev. V1.0 / V2.0	HW-Rev. V1.0 / V2.0	HW-Rev. V1.0 / V2.0	HW-Rev. V1.0 / V2.0

2.) Multicast filter function added.

Changes	HW-Rev. V1.0	HW-Rev. V2.0
Multicast Filtering	N/A	Enabling the QoS DIP switch will now also enable Multicast Filtering, which will block the MAC address within the range of 01-80-C2-00-00-02 to 01-80-C2-00-00-0F.

3.) Change of terminal block from screw connection to PUSH IN technology.

HW-Rev. V1.0	HW-Rev. V2.0
	

4.) Change of position for terminal block, DIP-Switch and PWR-LED.

Note: The housing color for HW-Rev. V2.0 will remain black. Same as for current HW-Rev. V1.0. The pictures shown for HW-Rev. V2.0 in table below, doesn't represent the final housing color.

Besides the changes shown under section “Technical changes”, there are no other changes in the product’s form, fit or functionalities.

3. Reason for change

Hardware re-design.

4. Availability

From April 2026. We perform a running change to phase in the new product versions. Therefore, availability of new product version depends on sales figures and stock level and thus may vary for the articles shown in table under section 5.

5. Affected parts
